

Business Central Procore Connector Setup Guide

This guide provides step-by-step instructions for installing and configuring the Procore Connector Application in both Microsoft Dynamics 365 Business Central and Procore.

Installing the Procore Connector in Business Central

The Procore Connector is available on Microsoft AppSource and can be installed directly within Business Central.

Configuring the Connector in Business Central

Enabling User Access

To access the Procore setup, go to the **User Setup** page in Business Central and enable the **Procore Admin** option (Boolean field). This grants access to the **Procore BC Integration Setup** page, where all required integration fields are located.

Procore Integration Setup in Business Central

In the **General** section of the **Procore-BC Integration Setup** page, fill in the following essential fields:

Procore App Client ID	Client Secret	Company ID	Authorization URL
Parent URL	Access Token URL	Access Token API	

These configurations are required to initialize and authenticate the integration between Business Central and Procore.

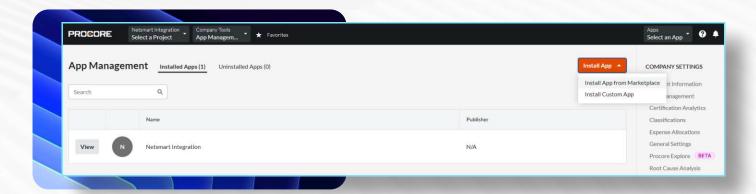

Note: This setup should be performed by the DynamicsSmartz team.

Installing the App in Procore

The connector app can be installed in Procore through one of two methods:

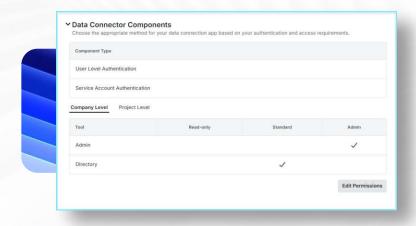

- Procore Marketplace: Search and install directly.
- **Custom App Installation:** Use the appropriate App Version Key (different for Sandbox and Production environments).

4 Settin

Setting Permissions in Procore

Ensure the app has the required permissions to function correctly. This is done via the Manage App section in Procore.

Within this section, you can:

- Edit the app's permission template.
- Access the Sandbox and Production App Version Keys needed for installation.
- Retrieve the Client ID and Client Secret from the OAuth Credentials tab on the left panel.

About DynamicsSmartz

DynamicsSmartz, a trusted full-service Microsoft Business Solutions provider since 1999, has been helping businesses scale through a comprehensive suite of Microsoft applications, including Business Central, Finance & Supply Chain Management, CRM, Field Service, and the Power Platform. As a division of Rochester-based Netsmartz LLC, DynamicsSmartz specializes in providing end-to-end services, including implementation, integration, and ongoing support.

Our team of over **150 experts and consultants brings deep industry expertise,** working closely with organizations to identify growth opportunities and help them achieve their full potential.

Our flagship solutions, <u>Construction365</u> and <u>ProjectPro</u>, streamline and automate the entire project management process for end-users and Microsoft partners respectively. These solutions enable seamless management of critical functions like job quoting, project accounting, resource management, material planning, customer relations, and much more—all within a unified database.
